Magickal Names

for People, Familiars, Domain Names,
and Businesses

by Eliza Fegley

Creating A Magickal Name

Creating a magickal name that is both original and personal is tough in this age of computers and “handles”. You may have an affinity for owls but there are already hundreds of “Owls” out there along with Owls that have assorted surnames such as Nightowl and MoonShineOwl.

Below is a lengthy list of Gods, Goddesses, adjectives, celestial objects, animals, etc., to help you create your own personal and original magickal name. Names may also be chosen for domain names, business names, and familiars.

The best way to use this list is to print it out and start circling the words that most appeal to you. From there, you can begin arranging the words to create a name you enjoy.

Magickal Names Dictionary

A

Name Cut-ups

Cut-ups are a way to randomly pick out words and form a sentence, name, haiku, etc. Below and on the following page are blank blocks where you can write words that interest you. Cut the squares, write the words, and place these into a bowl. Randomly pick out one word at a time to form the name that you want. Make sure to add descriptive words as well as nouns to your divining bowl.

If you are having trouble choosing between two or more names, write each name down on a separate piece of paper and set these outside on a table. At the end of the day, go out and see which paper has not been blown off the table. If all the names have been blown away, look around yourself. The gods may have another name for you and they will make it known if you only open your eyes and pay attention. If two or all the papers remain then the issue is undecided. Repeat setting the papers out the next day or leave them out overnight and return in the morning.

A 10x10 grid of dashed lines on a white background, intended for a drawing exercise. The grid consists of 10 rows and 10 columns of dashed lines, creating a total of 100 small squares. The lines are evenly spaced and extend across the entire page.
